

## An Internet Solution to Transform Ocean Cargo Business

Chubb has provided insurance products and services to the ocean cargo industry since 1882, yet there's nothing old-fashioned about our approach to this market. Business today is moving faster than the clipper ships of the 19th century. Your ocean cargo business needs a solution that can keep up with this rapid pace.

CargoPort<sup>SM</sup> by Chubb is a powerful, web-based application for managing ocean cargo operations worldwide through @chubb, our secure Internet site for agents, brokers and customers. The system's robust, online features will revolutionize the way that you do business with Chubb.

### features and benefits

Sophisticated, yet intuitive and easy to use, CargoPort offers real-time access to policy details and related import/export activity. Cargo certificates may be issued online, and shipping activity and storage exposures can be automatically recorded, reducing errors and eliminating cumbersome paperwork. In addition, a host of management reports may be viewed and printed to monitor activity by commodity, shipping points, conveyances and consignees. A first notice of loss can be submitted electronically for more expedient claim handling. Access to a proprietary vessel database simplifies the vessel verification process, and automatic OFAC searches help ensure compliance with U.S. sanctions. Likewise, invoice activity may be reviewed online at any time.

### *CargoPort makes it easy to:*

- View and print a policy
- Create, view and print cargo certificates
- Monitor shipping activity worldwide
- Report shipment/storage declarations
- Generate management reports
- Submit a first notice of loss
- Perform vessel verification and OFAC searches
- View and print invoice details

(Continued on back page)
